

Cracking the Code of Cleaning Validation with 4th Annual Cleaning Validation 2024 - A Practical Approach

Date: August 22nd-23rd, 2024

Venue: Radisson Blu Mumbai International Airport

For pharma, maintaining stringent cleaning standards is non-negotiable. The stakes are high, and the margin for error is slim. Cross-contamination can compromise product quality, endanger patient safety, and lead to costly regulatory penalties. Despite countless discussions, cleaning validation continues to be a burning issue, frequently cited in FDA Form 483 observations.

Recognizing these challenges, **Eminence Business Media** is proud to announce **the 4th Annual Cleaning Validation 2024 – A Practical Approach**. This event promises to equip you with the knowledge and skills needed to tackle cleaning validation head-on, ensure compliance, and enhance product safety.

Why This Event Stands Out:

Comprehensive Learning Experience: Over two action-packed days, delve into the core aspects of cleaning validation. From theoretical foundations to hands-on practical sessions, this workshop covers everything you need to know. Expect detailed discussions on effective cleaning practices, robust validation procedures, and meeting stringent regulatory requirements.

Practical Insights and Case Studies: Theory meets practice at our workshop. Engage with real-life case studies and interactive simulations that mirror industry scenarios. Understand emerging strategies for cross-contamination control in multi-product facilities through true-to-life learning environments.

Expert-Led Sessions: Learn from the best in the field. Our lineup of esteemed speakers brings their extensive experience and knowledge to the table. Participate in a fireside chat exploring the challenges of cleaning validation and strategies for navigating FDA 483 observations.

MACO Calculations Mastery: The mini-masterclass on Maximum Allowable Carryover (MACO) calculations. Gain in-depth knowledge of calculation methodologies and practical applications, ensuring compliance and maintaining product safety. Test your understanding with an engaging quiz and hands-on exercises.

Interactive and Engaging Format: We believe in making learning interactive and engaging. Participate in live Q&A sessions, group activities, and practical exercises designed to reinforce your understanding and address your specific queries. Enjoy networking breaks to connect with peers and industry leaders.

Continuous Learning and Support: The learning doesn't stop after the event. Benefit from a follow-up virtual session designed to address any questions that arise as you implement what you've learned. Additionally, enjoy six months of extended support, ensuring continuous learning and application in your professional life.

Who Should Attend: This workshop is ideal for professionals overseeing cleaning validation programs, including executives, directors, managers, specialists, engineers, and other experts in engineering, cleaning validation, manufacturing science and technology, process monitoring and control, quality assurance/quality control, risk management, audit, documentation and analysis, and microbiology.

Don't miss this opportunity to enhance your cleaning validation expertise and safeguard your processes against regulatory scrutiny. Join us at the Radisson Blu Mumbai International Airport for an event that promises to be insightful, practical, and transformative.

Register now and take the next step towards mastering cleaning validation in the pharmaceutical industry.

See you there!
