

Pharma Manufacturing & Automation Excellence Awards 2024: Honoring the Visionaries Behind Pharma's Transformational Growth

Driven by global demand, generics production, and increased domestic investment, India's pharma manufacturing sector has grown by **9% to 12% annually** over the past two years. Automation in the industry has also surged, with **15% to 18% annual growth**, as companies embrace digital technologies for greater efficiency and innovation.

Fueled by the global demand for innovative solutions, enhanced production capabilities, and the rise of automation technologies, the industry has seen remarkable advancements. Automation in pharma has particularly surged, streamlining processes and driving unparalleled efficiency, compliance, and productivity.

Amidst this transformative growth, the **Pharma Manufacturing & Automation Excellence Awards 2024** is set to honor the visionaries and organizations who have propelled the industry forward. Scheduled for **October 18th, 2024**, at the prestigious **Hotel Westin Mindspace, Hyderabad**, this event serves as a tribute to the brilliance and innovation shaping the future of pharma manufacturing.

This year's awards are centered around the theme "**Accelerating P.A.C.E.² for Manufacturing & Automation Excellence**," reflecting the focus on **Productivity, Automation, Compliance, Efficiency, and EHS** as key drivers of industry success. With 21 categories spanning both individual and organizational achievements, the awards celebrate the pioneering efforts that have revolutionized production, operations, and IT manufacturing within pharma.

What makes these awards stand out is their unwavering commitment to integrity and fairness. Judged by an elite panel of experts, the process is transparent and unbiased, ensuring that only the most deserving candidates receive recognition for their contributions.

In addition to celebrating excellence, the event also serves as a premium gathering for networking and collaboration among the industry's elite. Leaders from across the sector will come together to discuss the future of pharma manufacturing, exchange ideas, and build partnerships.
